

# Weblog

## **ASSIGNMENT SHEET** 24 JAN. 2012

You must maintain a weblog dedicated to this class, which you will use for posting images, articles, and links to websites that interest you.

The choice of software/service is yours, although you should be prepared to explain your decision (just as you should be prepared to explain every decision you make for this course). You should probably use a hosted blogging service like Posterous, Tumblr, or WordPress.com. Do not invest time in design.

Cultivate the habit of evaluating websites with a designer's eye. Over the course of the semester, save links to websites, articles, images, or other material that interests you, whether good, bad, or neither. Add at least two items a week – a link, a quote, or an image, along with a few sentences of commentary. We will share and discuss these items.

**DELIVERABLES.** One weblog and at least two posts/week (average).

**DUE:** reviewed through the length of the semester.
